Summary

I am an experienced AI engineer with over 5 years of experience in full-stack development and AI automation. My expertise encompasses machine learning, large language models (LLMs), and natural language processing (NLP), enabling me to design and implement sophisticated AI-powered chatbots and automation solutions. I excel in integrating AI capabilities into web applications through innovative API integrations and the development of robust AI wrappers, delivering seamless, automated experiences that drive business efficiency and enhance user engagement. My comprehensive skill set in both front-end and back-end development positions me to craft tailored, industry-specific solutions that address complex technological challenges.

Experience

wolf careers	**October 2022 - present**
full stack developer	Texas

Aganitha Cognitive Solutions	**August 2020 - September 2022**
full stack developer	hyderabad, india

Projects

AItomate

🔗 https://aitomates.com/

I am the founder of AITomates.com, where I specialize in providing businesses with AI-powered chatbots, intelligent automation solutions, lead capture, and CRM integration.
